

Healthcare environments, at-risk patients who require medical support, and the medical personnel who provide that essential care are especially vulnerable to the spread of COVID-19

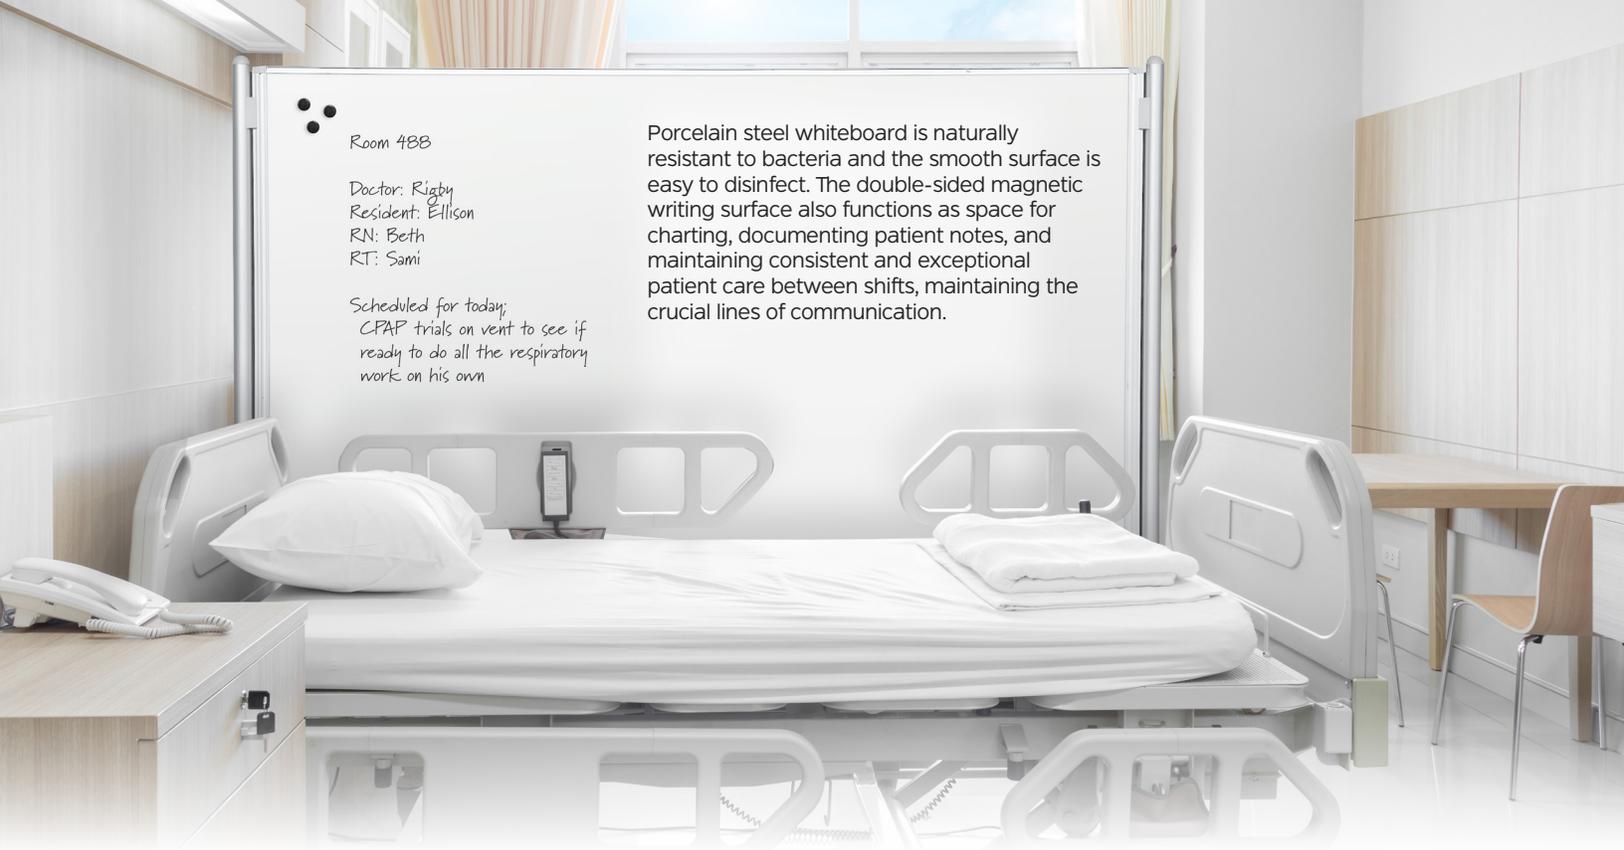

How Can We Help You?

Healthcare environments, at-risk patients who still require medical support, and the medical personnel who provide that essential care are especially vulnerable to the spread of COVID-19. As it stands now, many care facilities and staff are facing shortages of materials and supplies. MooreCo stands ready to offer you alternatives wherever and however we can.

We've always prioritized the health and safety of our customers and their environments, designing products with wellness in mind. We put a lot of thought into creating furniture and visual communication products from materials that are versatile, durable, and easy to disinfect. Here you can find information on our products that we are seeing in use in medical facilities across the country.

Our D.O.C. Mobile Partitions with porcelain steel are the ultimate in easy to use, move, and disinfect dividers, ideal for use in multi-patient hospital rooms, emergency centers, lobbies and waiting rooms, and anywhere temporary isolation shields are needed.

Room 488

Doctor: Rigby
Resident: Ellison
RN: Beth
RT: Sami

Scheduled for today;
CPAP trials on vent to see if
ready to do all the respiratory
work on his own

Porcelain steel whiteboard is naturally resistant to bacteria and the smooth surface is easy to disinfect. The double-sided magnetic writing surface also functions as space for charting, documenting patient notes, and maintaining consistent and exceptional patient care between shifts, maintaining the crucial lines of communication.

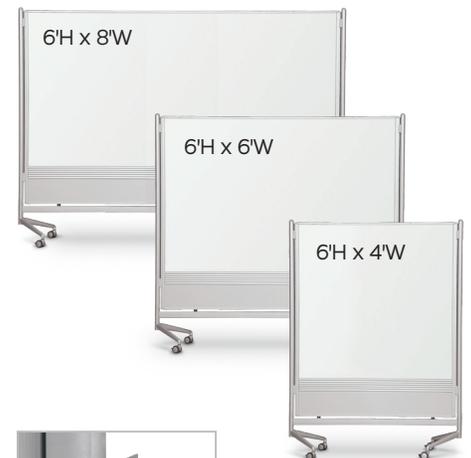

Our standard vinyl is treated to resist the growth of microbes including mildew and bacteria, effective against common bacteria such as staph, strep, and fungal spores including black mold and pink stain.

Colored Cork is self-sanitizing and naturally inhibits contaminants. A blend of oxidized linseed oil, dry pigments, and granulated cork with rosin binders, the surface is washable, self-healing, and low reflection.

You can also choose a high pressure laminate surface, which is non-porous and easy to keep germ-free. HPL also holds up to wear and tear and is scratch-resistant. Choose from a variety of colors and patterns to fit any space.

The anodized aluminum and steel trim, porcelain steel surface, and aluminum kickplate are non-porous and easy to clean and disinfect.

Available in three sizes for use in any room or open space. Easy to configure with minimal gapping. Available connectors join panels together at 90° angles for a more stable yet easy to rearrange configuration.
